Final Quiz (next Monday)

The format of the final quiz will be different than the quizzes we've had to date. You will have significant freedom to choose among a list of topics to write about. For studying, I recommend looking back at a **big picture** things we've done so far.

For example:

- *Light and how it's used in Astronomy*
- *Distance and how it's measured (e.g. distance ladder, etc.)*
- *Stellar Structure and Evolution*
- *Star Clusters and Stellar Populations*
- *Galaxy Types (and physical correlations to galaxies)*
- *Dark Matter (evidence for, effect of, explanations of)*
- *Something else… (as long as it is equivalently substantial)*
